

SUMMARY

- Motivated Software Developer with experience in building scalable web applications and backend systems .
- Skilled in developing efficient software solutions , integrating APIs , and working with Databases to support modern application architectures .
- Experienced in developing user-focused applications, optimizing system performance, and collaborating with teams to deliver reliable software solutions.
- Strong problem-solving mindset with a passion for learning new technologies and building impactful software systems.

WORK EXPERIENCE

AWC Software Pvt. Ltd.

Oct 2025

Key Result Areas:

- Tracked progress and managed tasks using JIRA within agile workflows
- Maintained applications end-to-end by debugging production issues, optimizing existing code, and ensuring smooth system performance
- Worked on both backend and frontend development to implement new features, improve user experience, and support application enhancements.
- Managed database connectivity and integrated scheduled processes to automate system tasks and ensure reliable application workflows.

PROJECTS UNDERTAKEN

Project: Asset Tracker

Details: Developed an asset management system that supports allocation and deallocation of organizational assets through an email-triggered workflow. It also supports asset tracking and automated notifications to ensure smooth request handling and better operational efficiency.

Project: Bank Guarantee Application

Details: Developed a Bank Guarantee application to manage guarantee requests , validation, and record tracking within the system. Implemented role-based access to ensure secure handling of operations by different users.

Project: Mobile Development support (Low Code)

Details: Worked on enhancing application functionality and resolving issues to ensure best performance and user experience.

Project: Microsoft Teams Automation and Cloud Integration

Details: Developed a cloud-integrated Microsoft Teams connector application using Microsoft 365 Developer tools to automate meeting scheduling and team Notifications . Implemented API-based integration with Microsoft Teams to send messages using Adaptive Cards.

Project: Multiple Disease Prediction

Details: Developed a machine learning-based application in Python to predict multiple diseases by analyzing key patient health metrics. The system uses real-world medical datasets to generate predictions with over 90% accuracy.

Project: Mind Forge

Details: Designed and developed a scalable full-stack LMS platform enabling secure user authentication and role-based access control . Implemented instructor dashboard with course creation, video uploads. Built student-side features including course browsing and interactive video-based learning experience

ACADEMIC CREDENTIALS

B Tech (CSE); 2025

Noida Institute of Engineering and Technology 76%

12th (Science); 2021

Assisi Convent School, Noida with 77%

10th; 2019

Assisi Convent School, Noida with 87%

CAREER HIGHLIGHTS

- Proficiently Developed and delivered business applications using modern development approaches, integrating databases and backend services to ensure smooth system functionality and reliable data handling. Also built applications on platforms such as Mendix and Power Apps with API integrations and workflow automation
- Completed multiple virtual and non-paid internships and technical training programs, gaining practical exposure to software development, cloud fundamentals, and real-world project environments .

TECHNICAL SKILLS

Languages: Python, Java , JS , SQL

Developer Tools: Git, Github, VSCode, Jupyter notebook, JIRA

Frameworks: Scikit-learn, TensorFlow/ Keras, Flask, Matplotlib, Seaborn, Streamlit Spring Boot , Node.js

Technologies: REST APIs, Machine Learning, Deep Learning , Mendix

Cloud: Microsoft Azure , AWS

CERTIFICATIONS

- AWS Certified Cloud Practitioner – Udemy (2025)
- Python Programming Certification – Coursera (2022)
- Databases and SQL for Data Science with Python – Infosys (2023)
- Mendix Rapid Developer Certification – Mendix Academy (2025)
